

Vireo 2.0 provides seven default options to export documents from the system. This table lists the contents and file naming conventions/formats of each.

\* denotes optional files which will only be exported if they are part of a submission.

Export Type	(Name and/or document format)	VireoExport	FileExport	DSpaceMETS	MODs	GenericQDC	DSpaceSimpleArchive
Exported as folder	submission_####	Yes	Yes	Yes	Yes	Yes	Yes
<b>Contents of folder</b>							
XML file	<i>varies with export type</i>	vireo		mets	mods	metadata	3 xml files are included <i>see Notes</i>
Primary document	LASTNAME-DOCUMENTTYPE-YEAR.pdf	Yes	Yes	Yes	Yes	Yes	Yes
*Supplementary document	As provided by author	Yes	Yes	Yes	Yes	Yes	Yes
*Administrative document	As provided by author	Yes					
*Source document	As provided by author	Yes	Yes	Yes	Yes	Yes	Yes
Institution License	LICENSE.txt	Yes		Yes	Yes	Yes	Yes
*ProQuest License	PROQUEST_LICENSE.txt	Yes		Yes	Yes	Yes	Yes
<b>Notes</b>		The XML file does not have all PQ/UMI fields	There is no metadata file	The mets file does not have all PQ/UMI fields			The xml files are dublin_core; metadata_local (includes embargo terms); and metadata_thesis (includes the degree name, type and department). There is also a "contents" file that shows the number and name of bundles

*The ProQuest UMI export is labeled differently than all the others--*

Export Type	ProQuest UMI
zip file labeled as	upload_LastName_FirstName.zip
<b>Contents of zip file</b>
